

## Standard LED OWAlifetime collection

The LED integrated lighting with a white powder-coated housing is particularly suitable for schools and public buildings where energy efficiency is a key factor. The Standard LED is compatible with many OWA systems.

|                          |                     |
|--------------------------|---------------------|
| Category                 | Integrated lighting |
| Input voltage            | 220-240 V           |
| Output voltage           | 41 W                |
| Luminous flux            | 3700 lm             |
| Colour temperature       | 4000K neutral white |
| Protection class         | IP 20               |
| Dimming                  | not possible        |
| Manufactured length (mm) | 622                 |
| Production width (mm)    | 622                 |
